

GANDIABLASCO FEATURED IN THREE OF THE MOST BEAUTIFUL HOTELS AROUND THE MEDITERRANEAN

The Mediterranean is probably GANDIABLASCO's best ally. The Valencia based company's furniture blends seamlessly with the natural surroundings of the shores of Mare Nostrum unlike any other place on earth, whether it be on the terraces of the Aegean Sea or the swimming pools of Provence rippled by the Mistral winds. This affinity with the light and the Mediterranean culture are perfectly illustrated through three of the most attractive projects featuring **GANDIABLASCO** that invite the eye on a visual tour through Turkey, the south of France and the Amalfi Coast.

The **D-HOTEL MARIS** is constructed amidst lavish olive plantations and rocky volcanic mountain scenery in an unspoilt nature reserve located on the Turkish peninsula of Datça. A natural paradise equipped with GANDIABLASCO outdoor furniture collections: the **SALER SOFT** loungers designed by **José A. Gandía-Blasco Canales Lloret** and elements of the **FLAT** collections created by Mario Ruiz as well as **NA XEMENA** by **Ramón Esteve**, perfectly integrated around the outdoor swimming pool, the Spa and the beaches which open off this magnificent setting. While the raised reclining **DAYBEDS** and the **PERGOLA SOFAS** designed by José A. Gandía Blasco Canales invite clients to savour this prodigious oasis of nature saturated with beauty and history.

The same elegant design and refined character that defines the GANDIABLASCO collections is featured in another boutique hotel which although slightly farther from the Mediterranean nevertheless exudes its way of life: the four star hotel **Le Vieux Castillon** that towers over the medieval town of Castillon du Gard in French Provence.

The hotel counts a generous terrace among its many charms with an outdoor pool surrounded by medieval castle walls that has been furnished with several GANDIABLASCO outdoor furniture collections.

The swimming pool area is equipped with the outdoor **NA XEMENA** loungers, the **LIPSTICK** armchairs and side tables created by **José A. Gandía-Blasco Canales**. On the opposite side the outdoor **DAYBED** with its own integrated canopy also designed by José A. Gandía-Blasco Canales provides the perfect refuge from the scorching sun. While the **356** Chaiselongue loungers are perched within the pool for sunbathing in the water.

The **Casa Angelina** boutique hotel is another GANDIABLASCO project on the Mediterranean situated on the Amalfi Coast of Italy. Its terraces, with views over the sea, are sublime spaces where guests can enjoy views of the sheer cliffs that surround the Amalfi coastline.

The white architecture of the Casa Angelina integrates with the sober and elegant designs of the **DNA** outdoor sofa collection created by **José A. Gandía-Blasco Canales**, accentuating the blue of the sea and the skies above.

The designer armchairs and outdoor tables of the **FLAT** collection by **Mario Ruiz** provide the room terraces with comfort and practical furnishings that blend seamlessly with the bleached colour palette of the building. Without forgetting the **STACK** loungers designed by **Borja García** that define the sunbathing area where shade is provided by the **ENSOMBRA** parasol designed by **Odosdesign**.
