ENVIABLE ENTRANCES ILLUMINATED BY VIBIA

An entry area is an opportunity to make a strong first impression, and businesses often use this space strategically to telegraph their unique culture and set an immediate mood. A key component in establishing this atmosphere is the lighting design—both to complement the furnishings and décor and to draw attention to specific spots and architectural details.

GAIA

A new landmark building in **Quito, Ecuador**, the Gaia building by KPMB Architects is a mixed-use space known for its distinctive ribbon-like façade. Adamson Associates and ERA Architects created an interior that's equally dramatic with a double-height entrance that mixes rich materials such as marble, wood and leather. Hovering overhead is **Arik Levy's Wireflow chandelier**, its slim black cables forming an ethereal, three-dimensional outline that echoes the sleek staircase railings and the foyer's open feel.

INRES

At the five-story Inres offices in **Florence, Italy**, the entrance acts as a transition between indoors and outdoors with floor-to-ceiling windows and a profusion of natural materials. The open space is anchored by a reception desk, above which hangs a trio of sleek **Skán** pendants. Designed by **Lievore, Altherr, Molina**, the lamp's striking simplicity and pure form is perfectly in keeping with the room's minimalist mien and organic sensibility.

NH CIUDAD DE SANTIAGO

Located in **Santiago, Chile**, the elegant NH Ciudad de Santiago hotel welcomes visitors with a dramatic entryway featuring a sweeping, circular staircase panelled in brass. Lighting design firm Opendark deployed **Toan Nguyen's Algorithm** pendant, affixed to the ceiling with a striking tubular steel lattice. Suspended over the steps, its long cables are studded with glowing, hand-blown glass spheres that recall a sparkling constellation and draw the eye upwards to a clear focal point.
