TUBE

"The lighting system channels the light extending horizontally and vertically to different heights in a fluid fashion." Ichiro Iwasaki

Tube

Designed by Ichiro Iwasaki, the modular Tube collection consists of a network of simple tubes that channels light to different shades. Minimalist in concept and form, it nevertheless provides powerful capabilities for flexible, customisable designs.

The steel conduits snake across the ceiling, creating a unique web of lines and angles that recall a metro map. They connect to up to four LED-powered shades, which can be positioned where desired. The shades are available in a variety of sizes, four colours of gray, and in ceiling or pendant styles with adjustable heights.

A FLUID LANDSCAPE OF LIGHT

Photography: Ricardo Gonçalves. Architecture: Aboim Inglez Arquitectos.

One of Tube's most compelling customisable features is the ability to combine the ceiling and pendant fixtures in a single lighting scheme, which users can create according to their own specifications at Vibia.

The ceiling lights, sleek and streamlined, cast a general, overhead glow in a room, while the pendants provide focused brightness in specific areas. Grouped together, the hybrid styles complement one another and serve multiple lighting needs simultaneously. What's more, the differences in height generates an intriguing visual rhythm yet still maintains a fluid, unified look.
